

**JAVA EMBEDDED SERVER MODULE FOR FORTE™ FOR JAVA™ IDE**

**ABSTRACT**

An apparatus and method for facilitating development of Java Embedded Server bundles which includes a module containing a set of development tools used in the creation of Java Embedded Server bundles. The module may include a code template  
5 tool having sample code segments; a Java Embedded Server manifest generator tool that creates Java Embedded Server manifest files for Java Embedded Server bundles; a Java Embedded Server jar packager tool that packages Java Embedded Server bundles; and a web page link tool having links to Java Embedded Server-related web pages.
